michal.h21@gmail.com

2021-06-30, version 0.2a

## 1 Introduction

This package provides script named ctanbib which can be used for retrieving of the bibliographic information for packages hosted on CTAN.

## 2 Usage

It can be used in the following way:

```
ctanbib [options] <packagename1> ... <packagenameX> > filename.bib
```

The curl utility needs to be installed on the user's system in order to support the package info download.

## 3 Available options

- c,--ctan** use the CTAN package entry as package URL instead of URL provided by the package.
- C,--ctanpath** use package's CTAN path as URL
- e,--entrypoint** explicitly set the BibTeX entry type.
- h,--help** print the help message.
- v,--version** print the version info.

## 4 Examples

```
ctanbib latex
```

This invocation will print data in the Bib~~La~~TeX format to the standard output:

```
@manual{latex,  
title = {The Latex package},  
subtitle = {A TeX macro package that defines LaTeX},  
author = {{The LaTeX Team} and Lamport, Leslie},  
url = {http://www.latex-project.org/},  
urldate = {2021-06-26},  
date = {},  
version = {2021-06-01},  
}
```

The `--ctan` option:

```
ctanbib -c latex
```

This produces a bib record that uses the CTAN package entry for the URL, instead of the original package URL.

```
@manual{latex,  
title = {The Latex package},  
...  
url = {https://ctan.org/pkg/latex},  
...  
}
```

The `--ctanpath` option:

```
ctanbib -C biblatex
```

This produces a bib record that uses the CTAN package tree location for the URL.

```
@manual{biblatex,  
...  
url = {/macros/latex/contrib/biblatex},  
...  
}
```

The `--entrytype` option:

```
ctanbib -e ctan latex
```

It selects different entry type for the record:

```
@ctan{latex,  
...  
}
```
