Chimonanthus praecox
Calicanto

Como, 7/10/2010

A photograph of several yellow and red flowers of Chimonanthus praecox (Wintersweet) on a dark brown branch. The flowers are in various stages of bloom, with some fully open and others as buds. The background shows a green lawn and a white building with a window.

Como, 29/10/2009

A close-up photograph of a Ruscus aculeatus plant. The plant features thick, woody, horizontal stems with small, dark green, lanceolate leaves. Several bright red, oval-shaped berries are visible, clustered along the stems. The background is dark and out of focus, showing some foliage and a hint of a building structure.

Como, 29/10/2009

A photograph of a Mespilus nespolo plant. The image shows two clusters of small, white, star-shaped flowers with yellow centers, each cluster surrounded by several large, dark green, elongated leaves. The leaves have prominent veins and some show signs of being eaten, with small holes visible. The background is dark and out of focus, suggesting a wooded area. The ground is covered with dry leaves and twigs.

Como, 29/10/2009

A photograph of a Mespilus Nespolo tree branch. The branch is covered with large, dark green, serrated leaves. Several clusters of small, light-colored flowers are visible, emerging from the leaf axils. The background is dark and out of focus, suggesting a wooded area. The text "Mespilus Nespolo" is written in yellow in the bottom left corner, and "Como, 29/10/2009" is written in white in the bottom right corner.

Como, 8/06/2010

A close-up photograph of a pomegranate tree. The image is filled with vibrant green, glossy leaves of various sizes. Several thin, brown branches crisscross the frame. In the center, a single pomegranate fruit is prominently displayed, its bright red, leathery skin cracked open to reveal the juicy, red seeds inside. To the left, another smaller, unopened red fruit is visible. The lighting is bright and natural, creating strong highlights and shadows on the leaves and branches.

Laurus nobilis
Alloro

Como, 30/04/2010

A close-up photograph of a Laurus nobilis (Alloro) branch. The image shows several dark green, elongated, glossy leaves with prominent veins. Interspersed among the leaves are small, dark, round berries. Some leaves show signs of aging or damage, with one leaf on the right being yellowed and another showing a brown, necrotic spot. The background is blurred, showing more foliage and light filtering through.

Como, 25/03/2011

A photograph of a garden scene featuring several flowering plants. In the center, a tall, upright plant with a dense spike of small, light blue-purple flowers stands out. This plant has dark green, lanceolate leaves. To its right and in the foreground, there are plants with rounded, green leaves, some of which are also in flower. The background is filled with various green plants, including some with long, thin leaves and others with small, white flowers. The lighting is bright, suggesting a sunny day, and the overall scene is a lush, green garden.
